

### LIVE-C Tech Update

[Register Now](#)

8:30 AM - 2:45 PM  
May 7, 2009

University of Maine,  
Wells Conference Center  
2nd Floor, Room 2

Live-C has been created as a distance learning users group for K-12 teachers and technology coordinators to facilitate collaboration and building resources for integrating distance learning into the classroom.

ACTEM in partnership with the University of Maine System has received a distance learning grant that will provide a suite of video conferencing solutions designed to support the distance learning needs of every K-12 school in the state. The project will provide the following capabilities to all schools in the state:

- Access to a 30 Port High Definition Bridge
- Access to a Video Gatekeeper to provide firewall traversal services as well as a inclusion in a state wide universal video conferencing phone directory
- Use of a Content Server giving schools the ability to record and archive video conferencing sessions
- Desktop Video
- Centralized management solution
- Access to staff development and classroom content
- Information on additional grant funding opportunities

This event is for technology coordinators, teachers, and administrators who are interested in learning more. See below for agenda information or [register now!](#)
