www.neiste.org

Space is limited. Preference will be given to those who want to become trainers for New England ISTE.

CANCELLATION POLICY:

You are welcome to send someone in your place, but we cannot refund money.

For questions or concerns -
president@neiste.org

New England ISTE is hosting a fun, hands-on workshop where you will learn how to teach Invention Literacy, Making, and Design Thinking using the award winning Makey Makey invention kit used by educators in all 50 states and around the world. This workshop is perfect for K-12 classroom teachers, technology professionals, and afterschool staff.

Learn best practices and gain access to a multimedia training website that you can use later when you train others or teach the students you serve. After this training you will be eligible to apply to become a lead trainer for NEISTE.

Technology Requirements: Bring Your Laptop & Charging Cable: Windows, Mac, Chromebook, Linux operating systems work great. Tablets will not work. Regardless of the kind of laptop used, it must have the ability to plugin a USB "type A" plug - - these are the most common type of USB plugs and it is how the Makey Makey is connected to a computer. Some new laptops do not accept a USB type A plug so the user must supply their own adaptor ("dongle").

NOTE: If you are using a school issued laptop make sure you're able to access the internet outside of school. Make sure you can access all websites (like YouTube). Sometimes school issued laptops are "locked down" or have some kind of restriction placed on them.
